SUMMARY

Full Stack Developer (Frontend & Backend) with a background in data analytics, focused on building clean, responsive, and scalable web applications. Experienced building RESTful APIs with Node.js and Express, and developing user-centered frontends with React. Motivated by building technology that solves real-world problems across Africa.

SKILLS

Frontend: React, JavaScript, HTML, CSS, Tailwind CSS, Bootstrap, Angular

Backend: Node.js, Express, NestJS, REST APIs, Zod, Python, Flask

Databases: PostgreSQL, SQL

Data & Analytics: Python, pandas, seaborn, Jupyter Notebook

Tools & DevOps: Git, GitHub, Postman, Render, Vercel, dbdiagram.io

EXPERIENCE

Full Stack Developer Intern — Toobrainz (Remote) May 2026 – Present

- Building RESTful APIs using Node.js and Express with Zod validation for input safety and consistency.
- Designing PostgreSQL schemas and writing migration files for structured, production-ready databases.
- Working across the stack with Angular and NestJS as part of a structured internship curriculum covering Git, SQL, Node.js, Express, Angular, and NestJS.
- Collaborating via Git/GitHub using structured PR workflows with code review by senior engineers.

Technical Operations — Contract — Zora African Market (Remote, UK-based) May 2026 – Present

- Managing product listings and backend data tasks for a UK-based African grocery e-commerce platform.
- Conducting monthly site checks and SEO optimizations to maintain search visibility and product accuracy.
- Collaborating with a remote team to ensure consistent product data and platform stability.

Frontend Developer — Cavista Hackathon Feb 2026

- Led all frontend development for ElderCare AI, a voice-first web health support system for elderly users.
- Implemented medication reminders, health check-ins, inactivity detection, and caregiver alerts.
- Delivered multilingual support across English, Yoruba, Igbo, and Hausa.

Frontend Developer — Lagos Impact Hackathon Dec 2025

- Built frontend features for SafeFlow, an AI-powered financial safety platform.
- Integrated UI with a serverless AWS backend for real-time anomaly detection and financial insights.

PROJECTS

SquadMind — React, Vite, FastAPI, Railway, Vercel

- Built an AI-powered financial intelligence and credit scoring platform for Nigerian SMEs at Squad Hackathon 3.0 (HabariPay/GTCO).
- Developed the React/Vite frontend as part of Team Technest; platform deployed to Vercel with FastAPI backend on Railway.

Property Listings REST API — Node.js, Express, Zod

- Built a full property listings REST API with CRUD operations, Zod validation, and structured error handling.
- Implemented PostgreSQL schema with 5 normalized tables, migration files, and EXPLAIN ANALYZE for query optimization.

ElderCare AI — React, Web Speech API, JavaScript

- Voice-first web health support system for elderly users with medication reminders and caregiver alerts.
- Multilingual support across English, Yoruba, Igbo, and Hausa.

Career Readiness & Tech Skill Gap — UNILAG 200L CS Students — Python, Pandas, Seaborn

- Designed and conducted a survey to analyze career readiness among 200-level CS students at UNILAG.
- Visualized findings and published results as a LinkedIn carousel with full project documented on GitHub.

PandaScroll — React, MangaDex API

- Manga reading site consuming the MangaDex API with smooth navigation and a responsive reader layout.

NotePad — *React, Flask, Python*

- Lightweight note-taking app with full CRUD functionality and a clean, minimal interface.

EDUCATION

B.Sc. Computer Science (In Progress) — **University of Lagos** 2024 – *Expected 2028*

CERTIFICATIONS

- Google Data Analysis with Python — Coursera | 2026
- Google IT Automation with Python Professional Certificate — Coursera / ITExperience Scholarship | In Progress
- 3MTT-Microsoft Skilling Program — Fellow ID: FE/26/9477818109 | 2026
- Responsive Portfolio Website with HTML, CSS & Netlify — Udemy | 2025
- TechCrush Cohort 7 Frontend Development Certificate — ACTD-Accredited, USA | Credential ID: TEC-A32BFFC3 | 2026
